DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, 11-24 and 29, drawn to an alternator having specific lead terminal details, classified in class 310, subclass 71.
- II. Claims 7-10 and 22-24, drawn to an alternator having a separator wall, classified in class 310, subclass 58.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a tandem alternator with enhanced separate cooling compartments for stator and rectifier without the lead terminal out of each minus rectifier element extending in an axial direction of the rotor toward the rear cover of invention I AND the lead terminal out of each minus rectifier element extending in an axial direction of the rotor toward the rear cover of invention I is not required with the separator wall structure of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to James Oliff on February 14, 2005 but did not result in an election being made.
